

Ingamepanel PDF VIEWER v2.0.0

Microsoft Flight Simulator

Sim Update 10 compatible

A panel that everyone who does not want to lose the immersion of the flight has to have.

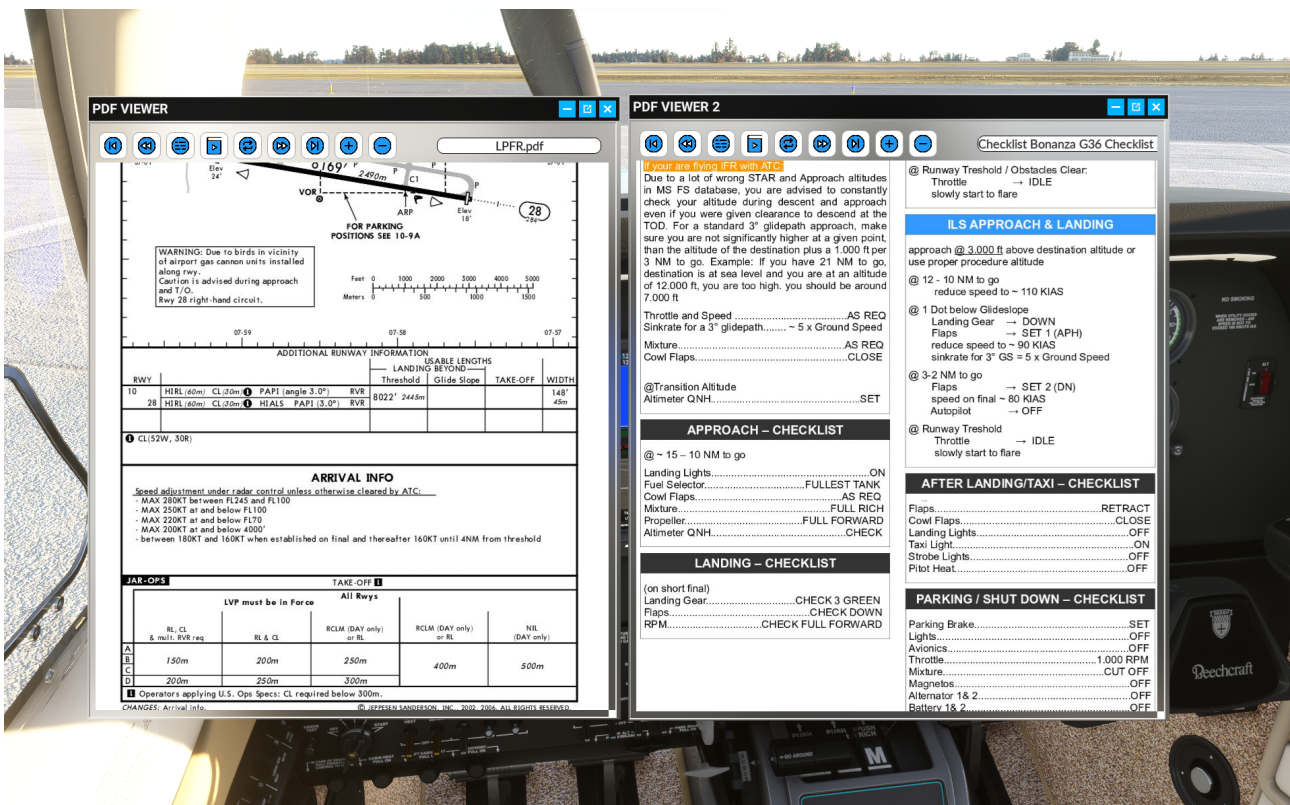

With PDF VIEWER you will be able to consult any PDF at the moment without leaving Flight Simulator.

Very powerful and versatile, without writing anything or doing searches.

With a few simple buttons that will allow you to move through the pages and through all the files in the PDF folder.

New with this version:

- New libraries!
- New refresh method. Resize event better.
- Zoom control - Oculus touch compatible
- New function to rotate PDF files.
- A new button on the panel to rotate PDFpages 90 degrees clockwise.
- Better handling of the resized windows. Now the buttons are kept in a line at a fixed size.
- Now it's faster than all previous versions. You can open bigger files.
- Two simultaneous panels. You will be able to open two PDF at the same time, or the same with different pages.

HOW TO INSTALL

1) Unzip the folder **fs-base-ingamepanels-pdf** in the Community folder of Flight Simulator.

When you start the flight you will see a new option **PDF VIEWER** in the options panel. Click on it and the PDF Viewer panel will open.

Also you have to unzip the webserver folder where you prefer (Desktop folder it's a good place).

IMPORTANT . -

You have to copy the PDF files into **FILES FOLDER of webserver/root**

webserver

root

files ← you have to copy your PDF files here

VERY IMPORTANT: Remember execute the webserver.exe of this folder (webserver) before to use the PDF Viewer Panel Addon.

If you use some panels that need webserver, you must merge the webserver folders.

The core of server is the same, but the root folder is different. You have to copy one over the other and the files of the root folder will be mixed.

OPTIONS

From left to right:

Previous File

Previous Page

Reload files into PDF folder (if you add any file while you are flying)

First Page of current PDF

Rotate page

Next Page

Next File

Zoom +

Zoom -

Very easy!!!

All options have been adapted for an optimal virtual reality experience
