

All in One Ingamepanel CANVAS v1.0.0

Microsoft Flight Simulator

Sim Update 11 compatible

Now you can load different backgrounds to draw on them.

New library faster!

Better resize event!

If you would like to be able to take notes when the ATC gives you instructions, this panel will help you.

It is a semi-transparent blank canvas where you can draw freehand, to write, take notes, write down whatever is necessary, etc.

You can choose from multiple colors, various line weights, and you can also undo and redo it in case you mess up.

Very easy to use and very powerful at the same time.

- Semi-transparent background
- Multiple colors
- Some line weights
- UNDO
- REDO
- CLEAR

OPTIONS
